Professional Summary

Founder, Chief Technology Officer (CTO), and Software Architect with 7+ years of experience spearheading the design, scalability, and deployment of cloud-native platforms, AI agent architectures, and secure transactional systems (AWS/GCP). Co-founder of GIROPLAY S.A.S. (Colombia) and Agrosurkapital LLC (USA), leading end-to-end engineering lifecycles, API governance, payment gateway integrations, and enterprise automation. Strategic technologist combining executive leadership and technical communication with hands-on expertise in high-impact distributed systems.

Professional & Entrepreneurial Experience

GIROPLAY S.A.S. | Medellín, Colombia

Co-Founder & Chief Technology Officer (CTO) / Software Engineering Director | Jan 2019 – Present

- Architected and directed full-lifecycle software development for high-throughput transactional platforms and custom enterprise payment collection gateways.
- Designed and governed robust RESTful API specifications aligned with OpenAPI/Swagger standards, enforcing security policies via JSON Web Tokens (JWT).
- Orchestrated cloud infrastructure across AWS and GCP, ensuring fault-tolerant deployments, automated scalability, and 99.9% service availability.
- Led cross-functional engineering and Tier-3 Customer Operations teams, drastically slashing critical incident resolution times while aligning product roadmaps with business goals.

AGROSURKAPITAL LLC | Wyoming, USA / Medellín, Colombia

Co-Founder & Head of AI Engineering | Jan 2021 – Dec 2026

- Engineered autonomous AI agents and conversational workflows tailored for enterprise-scale legal and operational workflow automation.
- Modeled complex business logic trees and orchestrated Large Language Models (LLMs), translating intricate statutory regulations into robust production algorithms.
- Built and deployed microservices on Google Cloud Platform (GCP), natively bridging AI workflows with relational transactional databases.
- Conducted extensive production usability testing, achieving a 40% reduction in operational errors across automated document processing pipelines.

CESDE HIGHER EDUCATION INSTITUTION | Medellín, Colombia

Adjunct Professor of Software Development & Tech Projects | Jan 2022 – Dec 2025

- Instructed and mentored 200+ engineering students in software architecture, OOP principles, Clean Code standards, and agile methodologies.
- Supervised 30+ applied software projects for SMBs, guiding students from domain modeling and schema design to production deployment.
- Integrated practical AI tooling into the academic curriculum, strengthening technical communication and problem-solving skills for emerging developers.

Key Projects & Products

- **WAIA (AI Agent Marketplace):** Architected backend in Python (FastAPI/AWS) for a marketplace deploying autonomous enterprise AI agents across commercial and legal operations. Selected and funded by SENA Fondo Emprender.
- **Viajeros.co (Intermunicipal Mobility & Tourism Platform):** Designed and deployed a full-stack platform (Next.js, TypeScript, PostgreSQL) featuring automated booking agents ("Luzia"), digital wallets, and payment gateways (Wompi Sandbox/Live).
- **Banking-as-a-Service Payment Processor:** Implemented a secure web-server payment pipeline integrating Bancolombia's technical BaaS infrastructure at Giroplay SAS.
- **Integrated Cultural Market System (SIMC):** Structured digital system awarded national recognition under the Colombian Government's CoCrea program.

Technical Skills & Competencies

- **Languages & Frameworks:** Python (FastAPI), TypeScript, JavaScript, Node.js, Next.js, React
- **Cloud, DevOps & Infrastructure:** Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Linux (Ubuntu), Git, GitHub
- **Architecture & Data:** Microservices, REST APIs, OpenAPI/Swagger, JWT, PostgreSQL, Firebase, Distributed Systems
- **Artificial Intelligence & Automation:** Autonomous Agents, LLM Orchestration, LangChain, Transactional Chatbots, RPA, Prompt Engineering
- **Governance & Operations:** Scrum/Kanban, Engineering Team Leadership, Tier-3 Customer Operations, Critical Incident Response

Education

- **Atlantic International University (AIU) | United States**
Bachelor of Science in Software Engineering (In Progress) | 2026 – Present
Executive Prior Learning Assessment (PLA) program. Graduation capstone focused on advanced architecture and deployment of autonomous AI agent systems.
- **Universidad de Antioquia | Medellín, Colombia**
B.A. in Social Communication – Journalism | Graduated 2024
Emphasis on strategic communication, audience research, technical writing, and synthesis of complex organizational processes.

- **Institución de Educación CESDE | Medellín, Colombia**

Associate Degree in Software & Application Development | Graduated 2021

Core computer science principles, relational database design, and Object-Oriented Programming (OOP).
